Tips for generating overlapping Then and Now Images

- Work out where the camera was positioned for the Then picture
- Take the Now picture from exactly the same position
- Use a lens with same or wider angle of view
- Import both images as layers into Photoshop (vary transparency)
- Resize and move Now image to overlap the Then image
- Crop image to remove non-overlapping areas
- Use Export Layers to Files to get two, same size, overlapping images
- Import into Powerpoint with Now on top with Wipe animation
